

Acknowledgments

The fourth edition of the *Set Lighting Technician's Handbook* marks a big step forward. In writing this edition, I was very fortunate to have the support of many top professionals in production as well as distinguished experts in the manufacturing sector. The insights and perspective they offered made it possible for me to write a well-rounded book about many exciting technologies. I am very grateful to Mike Bauman for his kind input and terrific photographs. In recent years, Mike has blazed a path embracing some of the most technologically advanced lighting solutions. I owe a debt of thanks to Richard Cadena, Scott Barnes, Josh Thatcher, Jeff Levi, and John Amorelli for their input on the subject of lighting control technology and moving lights. Thanks to Mike Wood (Mike Wood Consulting), Rob Gerlach (Selador/ETC), Ryan Fletcher (ARRI), David Amphlett (Gekko), Jim Sanfilippo (NILA), Richard Lund (Philips), and Lee Ford Parker (JiffyFX.com) for their valuable contributions to the new chapter on LEDs. Thanks to the terrific team at ARRI Lighting—John Gresch, Mike Jones, Aeron Weller, and An Tran—for their continuing support, and contributions especially in regard to HMI troubleshooting. The dazzling cover photo of this edition is by An Tran. Other experts in the field helped shape this new edition: Steve Terry (ETC), Michael Lay (Strand) lent their expertise on dimming; Bob Cookson (Illumination Dynamics) Russle Saunders (Saunders Generators) and Ron Dahlquist (Dadco) on transformers and generators; John Parkinson (Power To Light), Paul Tipple and Phil Ellems (Power Gems) on HMI electronic ballasts; Stewart Lennox (battery packs) and Guy Holt on small generators; Michael Skinner on entertainment industry applications of the National Electrical Code; Andy C. Huber on underwater lighting; and my old friend and colleague Brian O'Kelley lent an AD's perspective to the opening chapter. Other lighting professionals who contributed include Erik Messerschmitt, Mike Ambrose, Dave Devlin, Dwight Campbell, Martin Weeks, and many others. My thanks to the Local 728 Safety Training Program and Contract Services, especially Allan Rowe, whose comprehensive work developing Skills Training courses for Local 728 plays no small part in helping the membership remain the best trained, most experienced lighting technicians in the world. My sincere thanks to the many individuals who gave me feedback and suggestions for this edition: Daniel Aleksic, David E. Elkins, John Gates, Michael Hofstein, Seth Jason, and Stephen Lighthill.

I gratefully acknowledge the many manufacturers who provided technical information, photographs, and illustrations. The manufacturers are listed in Appendix F.

This book was first published in 1993. I am deeply indebted to many individuals for their generous contributions to this book over the years: Darryl Murchison, whose discussions during the early stages of writing the first edition helped set the book on course; Doug Pentek, Earl Gilbert, Larry Parker, Cyrus Yavneh, Russ Brandt, Dean Bray, Frieder Hochheim, Herb Breitling, Michael Kaiping, Scott Toland, and Jon Bart, all of whom read and improved sections of the book in its first and second editions; Richard Mula and Pete Romano, who shed much light on the subject of underwater lighting; Frank “the Dinosaur” Valdez and Gary Scalzo, who lent their expertise to the section on rigging; and Vance Trussell, whose suggestions and ongoing interest and encouragement were invaluable to me. My thanks to Eric King, who shared his expertise on HMIs and electronic ballasts. My thanks to Bernie Kret at Strand, who helped upgrade the section on electronic dimmers for the second edition. I owe a debt of gratitude to Chris Barratt, without whose generosity and vast

experience I could not have created the new section on generator troubleshooting, and whose legacy lives on despite his passing.

A special note of thanks to the illustrators, Shawn Murphy and Lisa Cyr, who created the hand-drawn illustrations for the first edition and who may well have been inking drawings on their wedding night to make the publication deadline. Praise also goes to the talents of John Huey, who created additional artwork for the second edition. For new illustrations in the third edition, I thank Dan Haberkorn. Thanks to my dear friend and colleague Mark Doering-Powell for his advice and artwork in the section on blue-screen photography. Thanks to Laura Mancini for modeling for the book, and to Keith Morgan, for lending a hand (and a couple of very nice lights). My thanks also to Doug Pentec and Carly Barber of Hollywood Rental and Robert Guzman of Concept Lighting for the use of their rental equipment in creating the artwork in the first edition, and Debra at Cineworks for use of equipment for artwork added in the third edition.

More than ever, I am grateful to the team at Focal Press—my editor Michele Cronin, Elinor Actipis, and Marie Lee, whose help, support, and buoyant optimism helped me see this through.

I am thankful, once again, to Joan Box, my faithful and talented (unofficial) copyeditor who has taken an interest in my writing since I was first able to form letters. It is a true testament to a mother's love that she endures all this techno mumbo-jumbo, but it is always a joy to work together on it.

Big, big, ginormous thanks, finally, to my loving wife Stacey, who is officially completely sick of this book at this point, and with good reason. Thank you for your patience and support. I love you with all my heart.
